DETAILED ACTION

Election/Restrictions

- Claims 18-29 are withdrawn from further consideration pursuant to 37 CFR
 1.142(b) as being drawn to a nonelected invention, there being no allowable generic or linking claim. Election was made without traverse in the reply filed on 6/12/2008.
- 2. Applicant's election without traverse of claims 1-17 of method invention in the reply filed on 6/12/2008 is acknowledged.
- 3. The method invention of claims 1-17 of this application contains claims directed to more than one species. These species are deemed to lack unity of invention because they are not so linked as to form a single general inventive concept under PCT Rule 13.1. These species do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, the species lack the same or corresponding special technical features for the following reasons:
- a. Species A, method for forming a pattern comprising forming a first region having a having a substance including a light-absorbing material over the light-transmitting substrate and the mask and forming a pattern on the second region by discharging a compound including a pattern forming material wherein the light-absorbing material is dissolved in the substance to form the substance including the light-absorbing material. It appears that claims 1-3, 4, 8 and 10 read on particular species A.

Application/Control Number: 10/574,616

b. Species B, method for forming a pattern comprising forming a first region having a having a substance including a light-absorbing material over the light-transmitting substrate and the mask and forming a pattern on the second region by discharging a compound including a pattern forming material wherein the light-absorbing material is dispersed in the substance to form the substance including a pigment. It appears that claims 1-3, 5-6, 8 and 10 read on particular species B.

- c. Species C, method for forming a pattern comprising forming a first region having a having a substance including a light-absorbing material over the light-transmitting substrate and the mask and forming a pattern on the second region by discharging a compound including a pattern forming material wherein a photocatalyst substance is used as the light-absorbing material is dissolved in the substance to form the substance including the light-absorbing material. It appears that claims 1-3, 7, 8 and 10 read on particular species C.
- d. Species D, method for forming a pattern comprising forming a first region having a having a substance including a light-absorbing material over the light-transmitting substrate and the mask and forming a pattern on the second region by discharging a compound including a pattern forming material wherein the substance including the light-absorbing material includes fluorocarbon chains. It appears that claims 1-3, 8, 9 and 10 read on particular species D.
- e. Species E, a method for manufacturing a thin film transistor comprising forming a first region including a light-absorbing material over the insulating layer, forming a second conductive layer on the second region by discharging a compound

Art Unit: 2894

including a conductive material wherein a pigment is used as light absorbing material to form the substance including the light-absorbing material. It appears that claims 11-12, 13 and 16-17 read on particular species E.

- f. Species F, a method for manufacturing a thin film transistor comprising forming a first region including a light-absorbing material over the insulating layer, forming a second conductive layer on the second region by discharging a compound including a conductive material wherein a photocatalyst substance is used as light absorbing material to form the substance including the light-absorbing material. It appears that claims 11-12, 14 and 16-17 read on particular species F.
- g. Species G, a method for manufacturing a thin film transistor comprising forming a first region including a light-absorbing material over the insulating layer, forming a second conductive layer on the second region by discharging a compound including a conductive material wherein the substance including the light absorbing material includes fluorocarbon chains. It appears that claims 11-12, 15 and 16-17 read on particular species G.
- 4. Applicant is required, in reply to this action, to elect a single species to which the claims shall be restricted if no generic claim is finally held to be allowable. The reply must also identify the claims readable on the elected species, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered non-responsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include

all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

5. Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species or invention to be examined even though the requirement may be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention.

The election of an invention or species may be made with or without traverse. To preserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse.

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Thanhha Pham whose telephone number is (571) 272-1696. The examiner can normally be reached on Monday and Thursday 9:00AM - 9:30PM.
